# ExtremeCloud™ IQ
## *Top 5 Features with Immediate Value*

1

UNIFIED NETWORK HEALTH OF ALL SITES

Quickly monitor Wi-Fi, Switching, and SD-WAN to pinpoint network issues causing downstream impact to users and other network devices.

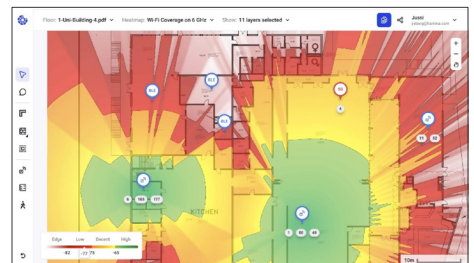

2

UNDERSTAND TRAFFIC TRENDS

Know broad-scale traffic trends across your sites, including users, costly assets, and impact from marketing campaigns.

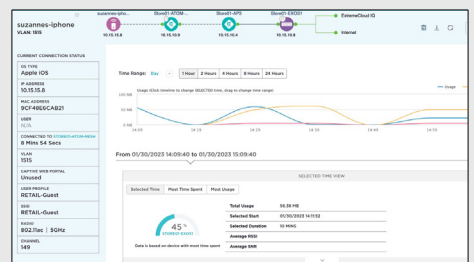

3

DESIGN AND VISUALIZE WI-FI

Integrate with easy-to-use mapping tools for designing high-performance wireless networks.

4

DEEP USER DEVICE DATA

Double click down to one user on your network to understand their experience, connectivity path, applications, and anything causing issues.

5

LEVERAGE YOUR GUEST NETWORK

Launch a guest network quickly to be able to collect important data from visitors, monetize ad placement, and draw attention to promotions.
