Webex Phones and Headsets

IP Phone

MPP (Multi-platform-phones)

Room Phone

Headset 500 series

Headset 700 series

IP Phones

Stay connected with Cisco IP Phones

- **IP Phone 7800 series:** latest generation of affordable, everyday, state-of-the-art, general business voice communications devices
- **IP Phone 8800 series:** latest generation of advanced voice communications devices, including state-of-the-art capabilities, including entry to HD video (720p) and telephony integration with personal mobile devices

MPP (multi-platform phones)

With Cisco IP Phones with Multiplatform Firmware, customers can enjoy Cisco's superior phone design, quality, and features while using Cisco-approved unified-communications-as-a-service (UCaaS) platforms.

- 6800 series: multiplatform phones (MPP) designed with enhanced affordability in mind. They deliver reliable, business-grade audio with Ethernet integration and use low power. They are ideal for customers with light, moderate, or active VoIP needs. The 6800 Series is supported only on Cisco-approved UCaaS providers.
- 7800 series: a great fit for small and medium businesses seeking high-quality telephony. Select models provide affordable entry to HD video. These phones offer an easy-to-use experience on Cisco-approved unified-communications-as-a-service (UCaaS) platforms
- 8800 series: Latest generation of advanced voice communications devices, including state-of-the-art capabilities, including entry to HD video (720p) and telephony integration with personal mobile devices.

Webex Room Phone

Room phone is much more than a conference phone. Connect to any external HD display and unlock content sharing, digital signage with Appspace and a great in-meeting experience

- HD Voice for calls and meetings: acoustic echo cancellation and noise reduction removes distractions from calls and meetings
- Easily join meetings: view the room calendar, join via the Webex button, or Zero-touch with proximity pairing from Webex apps
- Smart presentation and guest sharing: share locally or in-meeting wirelessly from Webex apps. Guests can share through a Web browser or using the HDMI cable
- Webex experience on a phone: this phone provides a superior in-meeting experience, with an external display, a participant list, and active speaker features

Headsets

Enhance communication experiences for IP Phones, desktop and mobile clients with headset accessories for different work environments

500 Series

- Professional range of headsets designed for workers in open workspaces enabling productive with: best-in-class noise isolation, vibrant audio, exceptional comfort and proven reliability
- Deep integrations with Cisco collaboration applications and devices allow for intuitive user experiences and intelligent IT headset management

700 Series

- Maximum flexibility, delivering outstanding audio performance and connectivity in any work environment
- Premium sound quality and noise-cancellation technology
- Fully integrated with Cisco Webex and optimised for use with Cisco IP Phones and soft clients
- Easy and intuitive back end management system
